**"Guardian of the Best in Numismatics"**

Vol. II — No. 1

MT. PROSPECT, ILLINOIS

January 20, 1960

By **TED R. HAMMER**

A coin that was popular with the public during its long life of more than 130 years is not so favored among collectors.

This coin is the \$5 gold piece, also known as the half eagle. Years ago, when gold coins still were minted, the \$5 gold coin was popular as a Christmas gift.

Among collectors, the \$2.50 gold piece [quarter eagle], the \$20, the \$1 gold and the \$3 probably are more popular than the five, as a specialty. They do not rate in that order necessarily, although the quarter eagle perhaps is the No. 1 favorite.

The half eagle was the first gold coin minted, according to records, although the \$10 coin first was struck the same year — 1795. The \$2.50 coin did not appear until 1796 and the \$20 was not minted until 1850 [after two reportedly were struck in 1849].

Mint officials failed to place on the coin any indication of its denomination until 1807. That year, a "5 D" was placed at the bottom of the reverse.

The liberty [V] nickel of 1883-1912 was of the same size as the \$5 gold piece and there was a slight resemblance in design. At a time when many men carried \$5 gold pieces in their pockets a gold coin was given in lieu of a nickel occasionally. One nickel, first of those minted in 1883, bore a large V on the reverse, for the denomination, but the word cents was not used. Many persons gilded the nickels and passed them for half eagles.

It is difficult to list a type

## CLUB NEWS

The North Central Iowa coin collectors met January 7 at 8:00 in the Hotel Moore at Clarion, Iowa.

The annual Southern Colorado Coin Convention will be held April 23 & 24, 1960 at the Whitman Hotel, Pueblo, Colorado. Bourse tables are available. Convention dinner Sat. evening. For details: Clyde Everhart, 909 West 14th Street, Pueblo, Colo.

## DID YOU KNOW?

File marks present on early U.S. coins are the result of weight adjustment by the mint.

break-down in the early half eagles because there were so many varieties among them, due to minor changes. There were two reverses the first year alone — 1795. Another main type is the 1807-1821, with a reverse change in 1822. The small head coronet type was introduced in 1839 to continue until 1908, with minor changes such as addition of the motto over the eagle beginning in 1866. The Indian head with the "modernistic" eagle on the reverse side appeared in 1908, remaining as the design until the last \$5 gold piece was struck in 1929. Some gold coins were minted later. The striking of all gold coins ceased when the United States went off the Gold Standard in 1933.

# GOLD

## AT 55% DISCOUNT

[from the 1934 value] by using cheap 1960 dollars [worth 45c].

MAKE TREMENDOUS

PROFITS

A gold price mark-up is inevitable and coming soon. Gold coin, selling at about 15% premium over gold content is a bargain — it costs only  $\frac{1}{2}$  as much in purchasing power as in 1934.

**PROTECT YOURSELF.** Gold is the safest inflation hedge. The U.S. dollar is fiat money — irredeemable in gold. Historically fiat money always becomes valueless.

**DEFEAT** the political spenders by buying gold — it is political dynamite. Strike a blow for free enterprise and sound money.

**LEARN** all about it. Read **The Gold Report**, now in its Fourth printing, a 40-page booklet on Why, Where, and How to buy gold bullion or coin — legally.

## Abridged List of Contents

The decaying dollar . . . Our shaky gold reserves . . . Conversion of the public debt into money . . . Gold prohibition and Fiat money . . . Gold is available to Americans . . . Will price of gold go up? Is \$35 a fair price? . . . Where do the Russians stand? . . . Gold as an investment . . .

Send \$3 to **The Gold Report**, Desk CE, 4606 Austin, Houston 4, Texas. Complete satisfaction or money refunded. Add 25c for airmail.
